

Compact Window / Wall Series

Reverse Cycle Cooling/Heating

Cooling only

PERFECT FOR ANY APPLICATION

QUIET & ENERGY EFFICIENT

Advanced technology for quieter operation

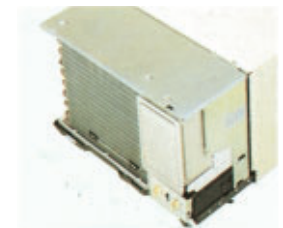

The perfect complement to any interior, Mitsubishi Electric window/wall air conditioners provide you with whisper-quiet operation thanks to highly advanced and energy-efficient rotary compressors. For extra comfort, these models feature an exhaust-damper system which helps to quickly clear the room of stale air with a push of a button.

COMPACT & EASY TO INSTALL

Saving you time and money

Designed small enough to fit easily in almost any apartment or house window, the compact window/wall type goes virtually unnoticed in any application. The window-type models also feature a slide-out chassis that simplifies installation and maintenance. Further adding to convenience is the one-touch air filter removal feature which allows the air filter to slide out easily for quick rinsing and cleaning.

SAFETY & RELIABLE

New Metal Box

The new metal box protects the electronic circuitry from dust and the unit from damage in the event of short circuit.

OTHER FEATURES

Four-Direction Airflow Control

Airflow can be easily adjusted in four different directions by moving the louvres.

Auto-Sweep system (MW(H)-12/17KV, MW-09RV)

Provides more uniform air distribution by directing blown air right and left.

Drain Splash (Cooling only)

A drain splash system evaporates drain water from the back of the unit, eliminating the need for a drain pipe.
