Memorises the household's usage patterns through various time frames to automatically operate the most optimal conditions by microprocessor.

The new L4 Series features the Inverter technology, which automatically adjusts the temperature and operation resulting in a higher efficient refrigerator.

LED control panel

Customise the temperature to keep food fresher for longer. Featuring four smart operation modes - Including Eco Mode, an energy saving setting which automatically adjusts the temperature, Rapid Cooling which cools quickly to preserve the freshness of food.

Ergonomic and user friendly

Designed for frequent access, the refrigeration compartment that is accessed most commonly is positioned at chest height. The separate drawers are placed conveniently from waist height down, providing quick and easy access.

The vegetable drawer

VitaLED lighting system positioned on the back wall of the vegetable drawer slows down the wilting process, creating the ideal environment for fruit and vegetables to stay fresher and crisper for longer.

Large bottle pockets

The smart big bottle door pocket is designed for convenient storage and retrieval of large and small bottles.

Twin fan multi airflow system

Twin ventilator fans blow and circulate air at various levels throughout the refrigerator and freezer compartments. This allows for even cooling distribution and keeps food fresher for longer.

Large capacity

With a large internal width of 800mm you have maximum storage capacity and more usable space for items such as bulky groceries and large platters.

Tempered glass shelves

The Tempered Glass Shelves are easy to clean, heat resistant and built to withstand up to 101 kilograms of weight.

Triple twist ice trays

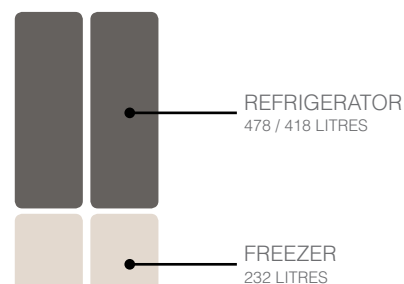

Release ice cubes from trays with a simple twist action into the collection box.
