The handy little phone
with WAP inside.

Trium
Mobile phones

When we're young, we use all our senses in conversation. Sight, hearing, smell, touch and even taste: it's all part of how we communicate with each other. But as we grow up, and we're no longer side-by-side, sometimes we need a little extra help to keep in touch. That's why Trium phones offer a rich selection of features and are 'WAP' ready for internet access and e-mail. Making conversation even more of a pleasure. The pleasure of *conversation*.
