Advanced Plug & Play Compatibility

Diamond View monitors support Microsoft Windows 95 and Windows 98's Plug and Play features. Monitors can be automatically identified and adapt to the computer's settings, providing users with remarkable display performance for any given monitor-system combination.

Superior Image Fidelity

In addition, the Diamond View series can synchronise colour matching between both display and output devices by manual colour adjustment. Their dynamic-focus technology further enhances the clarity and definition with which they display images.

Incredible Power Saving

Diamond View monitors have excellent power management ability. When the system is idle, the monitor automatically cuts its power consumption by up to 95%.
