

GOT Simple Series

GS21

PRODUCT FLYER

These simple but powerful wide screen HMIs were developed for cost-efficient optimisation of controlling and monitoring various factory automation products.

Wide Screen

WVGA screen has sufficient display area for long alarm messages or wide trend graph display. Screen sizes of 7" and 10", up to 9 MB internal memory.

Password Security

Setting the operation and the viewing authority per operator achieves "enhanced security" and "prevention of improper operation". Operator authentication can be performed at startup and when the screen is switched.

Backup/Restore Function

When the programs and parameters are backed up in a SD card, the data and machine operation can instantly be restored even if an unexpected failure occurs.
