Prior to use, thoroughly read the instructions in this manual to use the product correctly. Retain for future reference. Make sure that all the included manuals are passed on to any future users. To ensure safety and proper operation of the remote controller, the remote controller should only be installed by qualified personnel.
Safety precautions

• Thoroughly read the following safety precautions before using the unit.
• Observe these precautions carefully to ensure safety.

⚠️ WARNING
Indicates a risk of death or serious injury.

⚠️ CAUTION
Indicates a risk of serious injury or structural damage.

• After reading this manual, pass it on to the end user to retain for future reference.
• Keep this manual for future reference and refer to it as necessary. This manual should be made available to those who repair or relocate the controller. Make sure that the manual is passed on to any future users.

General precautions

⚠️ WARNING
Do not install the unit in a place where large amounts of oil, steam, organic solvents, or corrosive gases, such as sulfuric gas, are present or where acidic/alkaline solutions or sprays are used frequently. These substances can compromise the performance of the unit or cause certain components of the unit to corrode, which can result in electric shock, malfunctions, smoke, or fire.

To reduce the risk of shorting, current leakage, electric shock, malfunctions, smoke, or fire, do not wash the controller with water or any other liquid.

To reduce the risk of injury or electric shock, before spraying a chemical around the controller, stop the operation and cover the controller.

To reduce the risk of injury or electric shock, stop the operation and switch off the power supply before cleaning, maintaining, or inspecting the controller.

If any abnormality (e.g., burning smell) is noticed, stop the operation, turn off the power switch, and consult your dealer. Continued use of the product may result in electric shock, malfunctions, or fire.

Properly install all required covers to keep moisture and dust out of the controller. Dust accumulation and water can cause electric shock, smoke, or fire.

⚠️ CAUTION
To reduce the risk of fire or explosion, do not place flammable materials or use flammable sprays around the controller.

To reduce the risk of environment pollution, consult an authorized agency for proper disposal of remote controller.

To reduce the risk of damage to the controller, do not directly spray insecticide or other flammable sprays on the controller.

To reduce the risk of electric shock or malfunctions, do not touch the touch panel, switches, or buttons with a pointy or sharp object.
To reduce the risk of injury and electric shock, avoid contact with sharp edges of certain parts.

To prevent injury from broken glass, do not apply excessive force on the glass parts.

To reduce the risk of injury, wear protective gear when working on the controller.

### Precautions for moving or repairing the controller

**WARNING**

The controller should be repaired or moved only by qualified personnel. Do not disassemble or modify the controller. Improper installation or repair may cause injury, electric shock, or fire.

**CAUTION**

To reduce the risk of shorting, electric shock, fire, or malfunction, do not touch the circuit board with tools or with your hands, and do not allow dust to accumulate on the circuit board.

### Additional precautions

To avoid damage to the controller, use appropriate tools to install, inspect, or repair the controller.

This controller is designed for exclusive use with the Building Management System by Mitsubishi Electric. The use of this controller for other systems or for other purposes may cause malfunctions.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

To avoid discoloration, do not use benzene, thinner, or chemical rag to clean the controller. To clean the controller, wipe with a soft cloth soaked in mild detergent that is diluted with an appropriate amount of water, and wipe down with a wet cloth followed by a dry cloth. Do not use the detergent straight.

To avoid damage to the controller, provide protection against static electricity.

This appliance is intended to be used by expert or trained users in shops, in light industry and on farms, or for commercial use by lay persons.

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Function buttons

- [Image of function buttons]
① **ON/OFF** button
Press to turn ON/OFF the indoor unit.

② **SELECT** button
Press to save the setting.

③ **RETURN** button
Press to return to the previous screen.

④ **MENU** button  Page 20
Press to bring up the Main menu.

⑤ **Backlit LCD**
Operation settings will appear. When the backlight is off, pressing any button turns the backlight on and it will stay lit for a certain period of time depending on the screen.

When the backlight is off, pressing any button turns the backlight on and does not perform its function. (except for the **ON/OFF** button)

⑥ **ON/OFF lamp**
This lamp lights up in green while the unit is in operation. It blinks while the remote controller is starting up or when there is an error.

⑦ **Function button F1**
Main display: Press to change the operation mode.
Menu screen: The button function varies with the screen.

The functions of the function buttons change depending on the screen. Refer to the button function guide that appears at the bottom of the LCD for the functions they serve on a given screen.

When the system is centrally controlled, the button function guide that corresponds to the locked button will not appear.

⑧ **Function button F2**
Main display: Press to decrease temperature.
Main menu: Press to move the cursor left.
Menu screen: The button function varies with the screen.

⑨ **Function button F3**
Main display: Press to increase temperature.
Main menu: Press to move the cursor right.
Menu screen: The button function varies with the screen.

⑩ **Function button F4**
Main display: Press to change the fan speed.
Menu screen: The button function varies with the screen.
Controller components

Display

The main display can be displayed in two different modes: “Full” and “Basic.” The factory setting is “Full.” To switch to the “Basic” mode, change the setting on the Main display setting. (Refer to page 57.)

**Timer**

F1: Press to move the cursor left.
F2: Press to move the cursor right.
F3: Press to decrease the value by 1.
F4: Press to increase the value by 1.

The table below summarizes the square icons used in this manual.
Basic operations

Power ON/OFF

Button operation

ON

Press the ON/OFF button. The ON/OFF lamp will light up in green, and the operation will start. When “LED lighting” is set to “No,” the ON/OFF lamp will not light up.

OFF

Press the ON/OFF button again. The ON/OFF lamp will come off, and the operation will stop.
Operation mode, temperature, and fan speed settings

Button operation

Operation mode

Each pressing of the F1 button cycles through the following operation modes.
Select the desired operation mode.

Cool
Dry
Fan
Auto
Heat

• Operation modes that are not available to the connected indoor unit models will not appear on the display.

What the blinking mode icon means
The mode icon will blink when other indoor units in the same refrigerant system (connected to the same outdoor unit) are already operated in a different mode. In this case, the rest of the unit in the same group can only be operated in the same mode.

<Auto (dual set point) mode>

When the operation mode is set to the Auto (dual set point) mode, two preset temperatures (one each for cooling and heating) can be set. Depending on the room temperature, indoor unit will automatically operate in either the Cool or Heat mode and keep the room temperature within the preset range.

The graph below shows the operation pattern of indoor unit operated in the Auto (dual set point) mode.
Basic operations

Preset temperature

<Cool, Dry, Heat, and Auto (single set point)>

Press the F2 button to decrease the preset temperature, and press the F3 button to increase.

- Refer to the table on page 17 for the settable temperature range for different operation modes.
- Preset temperature range cannot be set for Fan/Ventilation operation.
- Preset temperature will be displayed either in Centigrade in 0.5- or 1-degree increments, or in Fahrenheit, depending on the indoor unit model and the display mode setting on the remote controller.

<Auto (dual set point) mode>

The current preset temperatures will appear. Press the F2 or F3 button to display the Settings screen.
Press the F1 or F2 button to move the cursor to the desired temperature setting (cooling or heating).
Press the F3 button to decrease the selected temperature, and press the F4 button to increase.
• Refer to the table below for the settable temperature range for different operation modes.
• The preset temperature settings for cooling and heating in the Auto (dual set point) mode are also used by the Cool/Dry and Heat modes.
• The preset temperatures for cooling and heating in the Auto (dual set point) mode must meet the conditions below:
  • Preset cooling temperature is higher than preset heating temperature.
  • The minimum temperature difference requirement between cooling and heating preset temperatures (varies with the models of indoor units connected) is met.
  • If preset temperatures are set in a way that does not meet the minimum temperature difference requirement, both preset temperatures will automatically be changed within the allowable setting ranges.

Settable preset temperature range

<table>
<thead>
<tr>
<th>Operation mode</th>
<th>Preset temperature range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cool/Dry</td>
<td>19 ~ 30 ºC (67 ~ 87 ºF)</td>
</tr>
<tr>
<td>Heat</td>
<td>17 ~ 28 ºC (63 ~ 83 ºF)</td>
</tr>
<tr>
<td>Auto (Single set point)</td>
<td>19 ~ 28 ºC (67 ~ 83 ºF)</td>
</tr>
<tr>
<td>Auto (Dual set points)</td>
<td>[Cool] Preset temperature range for the Cool mode [Heat] Preset temperature range for the Heat mode</td>
</tr>
<tr>
<td>Fan/Ventilation</td>
<td>Not settable</td>
</tr>
</tbody>
</table>

The settable temperature range varies with the model of indoor units.

Fan speed

Each pressing of the F4 button cycles through the following fan speeds.

• The available fan speeds depend on the models of connected indoor units.

### Restrictions for the sub remote controller

The following settings cannot be made from the sub remote controller. Make these settings from the main remote controller. “Main” is displayed in the title of the Main menu on the main remote controller.
- **Timer** (On/Off timer, Auto-Off timer, Weekly timer, Night setback, OU silent mode)
- **Energy saving** (Auto return, Schedule)
- **Maintenance** (Manual vane angle)
Navigating through the menu

Navigating through the Main menu

Button operation

Accessing the Main menu

Press the Menu button on the Main display.

The Main menu will appear.

Item selection

Press F2 to move the cursor left.
Press F3 to move the cursor right.
Function settings

Vane•Louver•Vent. (Lossnay) ON

Button operation

Accessing the menu

Select “Operation” from the Main menu (refer to page 20), and press the [SELECT] button.

Select “Vane•Louver•Vent. (Lossnay)” from the Operation menu, and press the [SELECT] button.
**Function settings**

**Vane setting**

Each pressing of the F1 or F2 button cycles through the following vane settings. Select the desired setting.

- **Auto**
- Step 1
- Step 2
- Step 3
- Step 4
- Step 5
- **Swing**

Select “Swing” to move the vanes up and down automatically.

When set to “Step 1” through “Step 5”, the vane will be fixed at the selected angle.

- **(h)** under the vane setting icon
  - This icon will appear when the vane is set to “Step 5” and the fan operates at low speed during cooling or dry operation (depends on the model).
  - The icon will go off in an hour, and the vane setting will automatically change.

**Louver setting**

Press the F4 button to turn the louver swing ON and OFF.

- Off
- On

(Sample screen on CITY MULTI)
Ventilation setting

Each pressing of the F3 button cycles through the following ventilation settings.
* Settable only when Lossnay unit is connected.

Off  Off  Low  Low  High  High

- The fan on some models of indoor units may be interlocked with certain models of ventilation units.

Returning to the Operation menu

Press the RETURN button to go back to the Operation menu.
Function settings

High power

Function description

High-power operation function allows the units to operate at higher-than-normal capacity so that the room air can be conditioned to an optimum temperature quickly. This operation will last for up to 30 minutes, and the unit will return to the normal operation mode at the end of the 30 minutes or when the room temperature reaches the preset temperature, whichever is earlier. The units will return to the normal operation when the operation mode or fan speed is changed.

Button operation

1. Select “High power” from the Operation menu during Cooling, Heating, or Auto operation, and press the SELECT button.

   “High power” function is available only on the models that support the function.

2. Move the cursor to “Yes” with the F3 or F4 button, and press the SELECT button.

   A confirmation screen will appear.

Navigating through the screens

- To go back to the Main menu ........... MENU button
- To return to the previous screen ........ RETURN button
Manual vane angle

Button operation

1. Select “Comfort” from the Operation menu, and press the SELECT button.

2. Select “Manual vane angle” with the F1 or F2 button, and press the SELECT button.
Move the cursor to “Ref. address” or “Unit No.” with the F1 button to select. Select the refrigerant address and the unit number for the units to whose vanes are to be fixed, with the F2 or F3 button, and press the SELECT button.

- Ref. address: Refrigerant address
- Unit No.: 1, 2, 3, 4

Press the F4 button to confirm the unit.

The screen at left shows a sample display on Mr. SLIM. On CITY MULTI units, “M-NET address” is displayed instead of “Ref. address”, and the “Unit No.” will not be displayed.

Select “Vane” with the F1 button.

Select “4-way” or “2-way” with the F2 or F3 button, and press the F4 button.
The current vane setting will appear.

Select the desired outlets from “1,” “2,” “3,” “4,” or “1, 2, 3, 4 (all outlets)” with the F1 or F2 button.

Press the F3 or F4 button to go through the following options and select the desired setting.

- No setting
- Step 1
- Step 2
- Step 3
- Step 4
- Step 5
- Draft reduction*
- All outlets

Press the SELECT button to save the settings. A screen will appear that indicates the setting information is being transmitted. The setting changes will be made to the selected outlet. The screen will automatically return to the previous screen when the transmission is completed. Make the settings for other outlets, following the same procedures.

If all outlets are selected,  will be displayed the next time the unit goes into operation.

Navigating through the screens
- To return to the previous screen ...... RETURN button

*Draft reduction
The [Draft reduction] mode keeps the vane angle more horizontal than the angle of Step 1 so that the airflow will not be directed toward the people. This function can be set only for one outlet. This function cannot be set for models with two or three outlets. In the Draft reduction mode, the airflow may cause the ceiling discoloration.
Function settings

Timer (On/Off timer)

Button operation

1. Select “Timer” from the Main menu (refer to page 20), and press the SELECT button.

   The On/Off timer will not work in the following cases: when On/Off timer is disabled, during an error, during check (in the service menu), during test run, during remote controller diagnosis, when the clock is not set, during function setting, when the system is centrally controlled (when On/Off operation or timer operation from local remote controller is prohibited).

2. Move the cursor to “Timer,” and press the SELECT button.

3. The current settings will appear.

   Move the cursor to “On/Off timer,” and press the SELECT button.
The screen to set the timer will appear.

Select the desired item with the F1 or F2 button out of “On/Off timer,” “On,” “Off,” or “Repeat.”

Change the setting with the F3 or F4 button.

• On/Off timer: No (disable)/Yes (enable)
• On: Operation start time
  (settable in 5-minute increments)
  * Press and hold the button to rapidly advance the numbers.
• Off: Operation stop time
  (settable in 5-minute increments)
  * Press and hold the button to rapidly advance the numbers.
• Repeat: No (once)/Yes (repeat)
Function settings

Press the SELECT button to save the settings.

A confirmation screen will appear.

Navigating through the screens

• To go back to the Main menu .......... MENU button
• To return to the previous screen ...... RETURN button

will appear on the Main display in the Full mode when the On/Off timer is enabled.

appears when the timer is disabled by the centralized control system.
Timer (Auto-Off timer)

Button operation

1. Bring up the Timer setting screen. (Refer to page 28.)
   Select “Auto-Off”, and press the SELECT button.

   The Auto-Off timer will not work in the following cases:
   when Auto-Off timer is disabled, during an error, during check (in the service menu), during test run, during remote controller diagnosis, during function setting, when the system is centrally controlled (when On/Off operation or timer operation from local controller is prohibited).

2. The current settings will appear.
   Move the cursor to “Auto-Off” or “Stop in --- min” with the F1 or F2 button.

3. Change the setting with the F3 or F4 button.
   • Auto-Off: No (disable)/Yes (enable)
   • Stop in --- min: Timer setting (The settable range is 30 to 240 minutes in 10-minute increments.)
Function settings

Press the **SELECT** button to save the settings.

A confirmation screen will appear.

**Navigating through the screens**

• To go back to the Main menu .......... **MENU** button
• To return to the previous screen .......... **RETURN** button

will appear on the Main display in the Full mode when the Auto-Off timer is enabled.

appears when the timer is disabled by the centralized control system.
Weekly timer

Button operation

1. Select “Weekly timer” from the Timer menu, and press the SELECT button.

   The Weekly timer will not work in the following cases:
   - when the On/Off timer is enabled,
   - when the weekly timer is disabled,
   - during an error,
   - during check (in the service menu),
   - during test run,
   - during remote controller diagnosis,
   - when the clock is not set,
   - during function setting,
   - when the system is centrally controlled (On/Off operation, temperature setting, or timer operation from local remote controller is prohibited).

2. The current settings will appear.

   The F1 or F2 button to see the settings for each day of the week.
   Press the F3 button to see patterns 5 through 8.
   Press the F4 button to display the status of Setting 2.

   Press the SELECT button to go to the setting screen.
Function settings

3

The weekly timer settings screen will appear.

In the "Action" setting, select “1” to enable the timer setting 1, or select “2” to enable the timer setting 2 with the F3 or F4 button. Then, press the SELECT button.

To check the setting contents of the timer setting 1 or 2, move the cursor to “Setting” with the F1 or F2 button, and select “1” or “2” with the F3 or F4 button.

4

The weekly timer setting screen will appear and the current settings will be displayed.

Up to eight operation patterns can be set for each day.

Move the cursor to the desired day of the week with the F1 or F2 button, and press the F3 button to select it. (Multiple days can be selected.)

Press the SELECT button.
Operation pattern setting screen will appear.
Press the F1 button to move the cursor to the desired pattern number.
Move the cursor to the time, On/Off, or temperature with the F2 button.
Change the settings with the F3 or F4 button.
- Time: settable in 5-minute increments
  * Press and hold the button to rapidly advance the numbers.
- On/Off/Auto: Selectable settings depend on the model of connected indoor unit. (When an Auto pattern is executed, the system will operate in the Auto (dual set point) mode.)
- Temperature: The settable temperature range depends on the connected indoor units. (1°C increments)
When the Auto (dual set point) mode is selected, two preset temperatures can be set. If an operation pattern with a single preset temperature setting is executed during the Auto (dual set point) mode, its setting will be used as the cooling temperature setting in the Cool mode.
Press the SELECT button to save the settings.
A confirmation screen will appear.

Navigating through the screens
- To go back to the setting change/day of the week selection screen ............................................. SELECT button
- To go back to the Main menu ............ MENU button
- To return to the previous screen ...... RETURN button

The icon will appear on the Main display in the Full mode when the weekly timer setting for the current day exists.
The icon will not appear while the On/Off timer is enabled or the system is under centralized control (Timer operation from local remote controller is prohibited).
Function settings

OU silent mode

Function description

This function allows the user to set the time periods in which priority is given to quiet operation of outdoor units over temperature control. Set the start and stop times each day of the week for the quiet operation. Select the desired silent level from “Middle” and “Quiet”.

Button operation

1. Select “OU silent mode” from the Timer menu, and press the SELECT button.

   “OU silent mode” function is available only on the models that support the function.

2. The current settings will appear.

   Press the F1 or F2 button to see the settings for each day of the week.
   Press the SELECT button to go to the setting screen.
3

The screen to enable (Yes) and disable (No) the silent mode will appear.

To enable this setting, move the cursor to “Yes” with the F3 or F4 button, and press the SELECT button.

4

The OU silent mode setting screen will appear.

To make or change the setting, move the cursor to the desired day of the week with the F1 or F2 button, and press the F3 button to select it. (Multiple days can be selected.)

Press the SELECT button.
Function settings

The setting screen will appear.

Move the cursor to the desired item with the F1 or F2 button out of Start time, Stop time, or Silent level. Change the settings with the F3 or F4 button.

- Start/Stop time: settable in 5-minute increments
  * Press and hold the button to rapidly advance the numbers.
- Silent level: Normal, Middle, Quiet

Press the SELECT button to save the settings. A confirmation screen will appear.

Navigating through the screens

- To go back to the setting change/day of the week selection screen ............................................ SELECT button
- To go back to the Main menu ............ MENU button
- To return to the previous screen ..... RETURN button

will appear on the Main display in the Full mode during the OU silent mode.
Night setback

Function description

This control starts heating operation when the control object group is stopped and the room temperature drops below the preset lower limit temperature. Also, this control starts cooling operation when the control object group is stopped and the room temperature rises above the preset upper limit temperature.

The Night setback function is not available if the operation and the temperature setting are performed from the remote controller.

If the room temperature is measured by the air-conditioner’s suction temperature sensor, the accurate temperature may not be obtained when the air-conditioner is inactive or when the air is not clean. In this case, switch the sensor to a remote sensor (PAC-SE40TSA/PAC-SE41TS-E) or a remote control sensor.

Button operation

1. Select “Night setback” from the Timer menu, and press the SELECT button.

2. The current settings will appear.

Press the SELECT button to go to the setting screen.
Move the cursor to the desired item with the \texttt{F1} or \texttt{F2} button out of Night setback No (disable)/Yes (enable), Temp. range, Start time, or Stop time.

Change the settings with the \texttt{F3} or \texttt{F4} button.

- Temp. range: The lower limit temperature (for heating operation) and the upper limit temperature (for cooling operation) can be set. The temperature difference between the lower and upper limits must be 4ºC (8ºF) or more. The settable temperature range varies depending on the connected indoor units.
  - 1ºC increments

- Start/Stop time: settable in 5-minute increments
  * Press and hold the button to rapidly advance the numbers.

Press the \texttt{SELECT} button to save the settings.
A confirmation screen will appear.

\textbf{Navigating through the screens}
- To go back to the Main menu ............ \texttt{MENU} button
- To return to the previous screen ...... \texttt{RETURN} button
will appear on the Main display in the Full mode when the Night setback function is enabled.

appears when the timer is disabled by the centralized control system.

**The Night setback will not work in the following cases:**
when the unit is in operation, when the Night setback function is disabled, during an error, during check (in the service menu), during test run, during remote controller diagnosis, when the clock is not set, during function setting, when the system is centrally controlled (On/Off operation, temperature setting, or timer operation from local remote controller is prohibited).
Function settings

Restriction

Setting the temperature range restriction

Button operation

1. Select “Energy saving” from the Main menu (refer to page 20), and press the SELECT button.

2. Move the cursor to “Restriction” with the F1 or F2 button, and press the SELECT button.
The current settings will appear.

Move the cursor to “Temp. range” with the F1 or F2 button, and press the SELECT button.

The screen to set the temperature range will appear.

Move the cursor to the desired item with the F1 button out of “Temp. range,” “Cool•Dry,” “Heat,” or “Auto.”
Function settings

Change the settings with the F3 or F4 button.
- Temp. range: No (unrestricted) or Yes (restricted)
- Cool•Dry: Upper and lower limit temperature (1°C increments)
- Heat: Upper and lower limit temperature (1°C increments)
- Auto: Upper and lower limit temperature (1°C increments)

Temperature setting ranges

<table>
<thead>
<tr>
<th>Mode</th>
<th>Lower limit</th>
<th>Upper limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cool•Dry<em>1</em>3</td>
<td>19 ~ 30°C (67 ~ 87°F)</td>
<td>30 ~ 19°C (87 ~ 67°F)</td>
</tr>
<tr>
<td>Heat <em>2</em>3</td>
<td>17 ~ 28°C (63 ~ 83°F)</td>
<td>28 ~ 17°C (83 ~ 63°F)</td>
</tr>
<tr>

<td>19 ~ 28°C (67 ~ 83°F)</td>
<td>28 ~ 19°C (83 ~ 67°F)</td>
</tr>
</tbody>
</table>

* The settable range varies depending on the connected unit.
*1 Temperature ranges for the Cool, Dry, and Auto (dual set point) modes can be set.
*2 Temperature ranges for the Heat and Auto (dual set point) modes can be set.
*3 Temperature ranges for the Heat, Cool, and Dry modes must meet the conditions below:
  - Upper limit for cooling - upper limit for heating ≥ Minimum temperature difference (varies with indoor unit model)
  - Lower limit for cooling - lower limit for heating ≥ Minimum temperature difference (varies with indoor unit model)
*4 Temperature range for the Auto (single set point) mode can be set.

Press the SELECT button to save the settings.
A confirmation screen will appear.

Navigating through the screens
- To go back to the Main menu .......... MENU button
- To return to the previous screen ...... RETURN button

will appear on the Main display in the Full mode when the temperature range is restricted.
Restriction

Operation lock function

Button operation

Bring up the Restriction setting screen. (Refer to page 42.)

Move the cursor to “Operation locked” and press the SELECT button.

To enable the operation lock function, set the item “Operation locked” to “Yes”.

1

Setting display:

- Operation locked
- On/Off Mode
- Set temp.
- Vane
- Fan
- Louver

Options:

- Page
- Back
- Select
- Exit
Function settings

The screen to make the settings for the operation lock function will appear.

Move the cursor to the desired item with the F1 or F2 button out of “Operation locked,” “Location,” “On/Off,” “Mode,” “Set temp.,” “Menu,” “Fan,” “Louver,” or “Vane.”

Change the settings with the F3 or F4 button.
• Operation locked: No (disable)/Yes (enable)
• Location: “Individual” or “Hotel”
• On/Off: On/Off operation
• Mode: Operation mode setting
• Set temp.: Preset temp. setting
• Vane: Vane setting
• Menu: Menu setting
• Fan: Fan speed setting
• Louver: Louver setting

When “Hotel” is selected for the “Location” setting, the following operations will be locked automatically: Mode, Vane, Menu, and Louver.

Press the SELECT button to save the settings. A confirmation screen will appear.

Navigating through the screens
• To go back to the Main menu ............ MENU button
• To return to the previous screen ........ RETURN button
will appear on the Main display in the Full mode when the operation lock function setting is enabled.

Operation guide that corresponds to the locked function will be suppressed.

To display the main menu while the menu setting is being locked, press and hold the [Menu] button for ten or more seconds. Enter the administrator’s password on the password input screen.
Function settings

Energy saving

Automatic return to the preset temperature

After the Auto return function is enabled, when the operation mode change or ON/OFF operation is performed from this remote controller, the set temperature automatically returns to the required temperature regardless of the set time.

Button operation

2. The current settings will appear.

Move the cursor to “Auto return” with the F1 or F2 button, and press the SELECT button.
The screen to make the settings for the automatic return to the preset temperature will appear.

Move the cursor to the desired item with the F1 or F2 button out of “Auto return,” “Cool,” or “Heat.”

Change the settings with the F3 or F4 button.
- Auto return: No (disable)/Yes (enable)
- Cool: Timer setting range is 30 to 120 minutes in 10-minute increments. Temperature setting range is 19 to 30°C (67 to 87°F) (1°C increments).
- Heat: Timer setting range is 30 to 120 minutes in 10-minute increments. Temperature setting range is 17 to 28°C (63 to 83°F) (1°C increments).

Press the [SELECT] button to save the settings. “Cool” includes “Dry” and “Auto Cool” modes, and “Heat” includes “Auto Heat” mode.

The screen to set the selected item will appear.

Navigating through the screens
- To go back to the Main menu .......... [MENU] button
- To return to the previous screen ...... [RETURN] button

Timer or preset temperature settings will not be effective when the temperature range is restricted and when the system is centrally controlled (when the temperature range setting from local controller is prohibited). When the system is centrally controlled (when timer operation from local remote controller is prohibited), only the timer setting will be ineffective.
Setting the energy-saving operation schedule

Button operation

1. Bring up the “Energy saving” screen. (Refer to page 48.)

   Move the cursor to “Schedule,” and press the SELECT button.

2. The screen to see the schedule will appear.

   Press the F1 or F2 button to see the settings for each day of the week.

   Press the SELECT button to go to the setting screen.

3. The screen to enable (Yes)/disable (No) the energy-saving operation schedule will appear.

   Select “No” or “Yes” with the F3 or F4 button.

   Press the SELECT button to go to the setting change/day of the week selection screen.
The setting change/day of the week selection screen will appear. 
Up to four operation patterns can be set for each day. 
Move the cursor to the desired day of the week with the F1 or F2 button, and press the F3 button to select it. (Multiple days can be selected.) 
Press the SELECT button to go to the pattern setting screen.

The pattern setting screen will appear. 
Press the F1 button to move the cursor to the desired pattern number. 
Move the cursor to the desired item with the F2 button out of the start time, stop time, and energy-saving rate (arranged in this order from the left).

- Start/Stop time: settable in 5-minute increments 
  * Press and hold the button to rapidly advance the numbers.
- Energy-saving rate: The setting range is 0% and 50 to 90% in 10% increments.

Press the SELECT button to save the settings. 
A confirmation screen will appear.

The lower the value, the greater the energy-saving effect.
will appear on the Main display in the Full mode when the unit is operated in the energy saving mode.

Navigating through the screens
- To go back to the setting change/day of the week selection screen ............................................. SELECT button
- To go back to the Main menu ............ MENU button
- To return to the previous screen ...... RETURN button
Select “Initial setting” from the Main menu (refer to page 20), and press the SELECT button.

Clock setting is required before making the following settings.

- On/Off timer
- OU silent mode
- Night setback
- Weekly timer
- Energy saving

If a given system has no system controllers, the clock time will not automatically be corrected. In this case, periodically correct the clock time.

Move the cursor to “Basic setting” with the F1 or F2 button, and press the SELECT button.

Select “Clock” with the F1 or F2 button, and press the SELECT button.
Function settings

4 Move the cursor to “Clock” with the F1 or F2 button, and press the SELECT button.

5 Move the cursor to the desired item with the F1 or F2 button out of year, month, date, hour, or minute. Increase or decrease the value for the selected item with the F3 or F4 button, and press the SELECT button.
A confirmation screen will appear.

Navigating through the screens
• To go back to the Main menu .......... MENU button
• To return to the previous screen ....... RETURN button
Daylight saving time

Function description

The start/end time for daylight saving time can be set. The daylight saving time function will be activated based on the setting contents.

- If a given system has a system controller, disable this setting to keep the correct time.
- At the beginning and the end of daylight saving time, the timer may go into action twice or not at all.
- This function will not work unless the clock has been set.

Button operation

1. Select “Clock” from the Basic setting menu, and press the [SELECT] button.

2. Move the cursor to “Daylight saving time” with the [F1] or [F2] button, and press the [SELECT] button.
Function settings

3

Move the cursor to the following items with the F1 button to make the settings.

• DST
  Select “No” (disable) or “Yes” (enable) with the F2 button. The default setting is “No.”

• Date(Start)*1
  Set the day of the week, week number, and month with the F3 or F4 button. The default setting is “Sun/5th/Mar.”

• Start time
  Set the start time for daylight saving time with the F3 or F4 button.

• Forward to
  Set the time when the clock is to be set forward to at the start time above with the F3 or F4 button.

• Date(End)*1 (2nd page)
  Set the day of the week, week number, and month with the F3 or F4 button. The default setting is “Sun/5th/Oct.”

• End time (2nd page)
  Set the end time for daylight saving time with the F3 or F4 button.

• Backward to (2nd page)
  Set the time when the clock is to be set backward to at the end time above with the F3 or F4 button.

*1 If “5th” is selected for the week number and the 5th week does not exist in the selected month of the year, the setting is considered to be “4th.”

Press the SELECT button to save the settings. A confirmation screen will appear.

Navigating through the screens
• To go back to the Main menu .......... MENU button
• To return to the previous screen ...... RETURN button
Select “Display setting” from the Initial setting menu, and press the SELECT button.

Move the cursor to “Main display” with the F1 or F2 button, and press the SELECT button.

Select “Full” or “Basic” (refer to page 8) with the F3 or F4 button, and press the SELECT button.

Navigating through the screens
- To go back to the Main menu .......... MENU button
- To return to the previous screen ...... RETURN button
Function settings

Black and white inversion setting

Button operation

1. Select “Display setting” from the Initial setting menu, and press the SELECT button.

2. Move the cursor to “Main display” with the F1 or F2 button, and press the SELECT button.

3. Select “B&W inversion” with the F1 or F2 button, and select the display mode “Yes” or “No” with the F3 or F4 button, and press the SELECT button. (The factory setting is “No.”)

Navigating through the screens

• To go back to the Main menu .......... MENU button
• To return to the previous screen ...... RETURN button
Selecting “Yes” will invert the colors of the display, turning white background to black and black characters to white as shown at left.
Function settings

Contrast•Brightness

Button operation

1. Select “Display setting” from the Initial setting menu, and press the SELECT button.

2. Move the cursor to “Contrast•Brightness” with the F1 or F2 button, and press the SELECT button.

3. Adjust the brightness with the F1 or F2 button. Adjust the contrast with the F3 or F4 button, and press the MENU or RETURN button.

Navigating through the screens
- To go back to the Main menu .......... MENU button
- To return to the previous screen ...... RETURN button
Language selection

Function description

The desired language can be set. The language options are English, French, German, Spanish, Italian, Portuguese, Swedish, Russian, Greek, Turkish, Dutch, Czech, Hungarian, and Polish.

Button operation

1. Select “Display setting” from the Initial setting menu, and press the SELECT button.

2. Move the cursor to “Language selection” with the F1 or F2 button, and press the SELECT button.
Function settings

Move the cursor to the language you desire with the F1 through F4 buttons, and press the SELECT button to save the setting.

When the power is on for the first time, the Language selection screen will be displayed. Select a desired language. The system will not start-up without language selection.

A screen will appear that indicates the setting has been saved.

Navigating through the screens
• To go back to the Main menu .......... MENU button
• To return to the previous screen ...... RETURN button
Initialize remote controller

Function description

The remote controller can be initialized to the factory shipment state. Note that the following data will be initialized.
The remote controller will automatically be started up after being initialized.

Timer setting, Weekly timer setting, OU silent mode setting, Energy saving setting, Energy saving option setting, Main/Sub setting, Clock setting, Daylight saving time setting, Main display setting, Contrast•Brightness setting, Display details setting, Auto mode setting, Model name setting, Serial No. setting, Dealer information setting, Error information, Administrator password, Maintenance password

Button operation

1. Select “Others” from the Service menu, and press the SELECT button.

2. Move the cursor to “Initialize remote controller” with the F1 or F2 button, and press the SELECT button.
Function settings

3

Select “OK” with the F4 button.

The remote controller will automatically be started up after being initialized.
Remote controller information

Function description

The information of the remote controller in use can be checked.

Button operation

1. Select “Others” from the Service menu, and press the SELECT button.

2. Move the cursor to “Remote controller information” with the F1 or F2 button, and press the SELECT button.

3. The model name, software version, and serial number of the remote controller in use can be checked.
Troubleshooting

Error information

When an error occurs, the following screen will appear and the operation LED will blink. Check the error status, stop the operation, and consult your dealer.

Button operation

1

Error code, error unit, refrigerant address, unit model name, date and time on which an error occurred, and serial number will appear.
The model name and serial number will appear only if the information have been registered.

Press the F1 or F2 button to go to the next page.

Contact information (dealer’s phone number) will appear if the information have been registered.
2

Press the \text{F4} button or the \text{ON/OFF} button to reset the error that is occurring.

\begin{center}
\textbf{Errors cannot be reset while the ON/OFF operation is prohibited.}
\end{center}

Select “OK” with the \text{F4} button.

A confirmation screen will appear.

\begin{center}
\textbf{Navigating through the screens}
\end{center}

- To go back to the Main menu \text{........... MENU} button
Checking the error information

While no errors are occurring, page 2/2 of the error information (refer to page 66) can be viewed from the menu operation.
Select “Maintenance” menu from the Main menu, and press the SELECT button.

To display the error information screen, select “Error information” from the Maintenance menu.
Errors cannot be reset.
No occupancy Auto-OFF

The following screen will appear for the 3D i-See sensor panel model when the unit is stopped due to the No occupancy Auto-OFF function of the energy saving option. Refer to the indoor unit Instruction Book for the 3D i-See sensor setting.
## Maintenance

### Filter information

![Filter Information Icon]

will appear on the Main display in the Full mode when it is time to clean the filters.

**Wash, clean, or replace the filters when this sign appears.**

Refer to the indoor unit Instructions Manual for details.

### Button operation

1. Select “Filter information” from the Maintenance menu, and press the **SELECT** button.

2. Press the **F4** button to reset filter sign.

Refer to the indoor unit Instructions Manual for how to clean the filter.
Select “OK” with the F4 button.

A confirmation screen will appear.

Navigating through the screens
- To go back to the Main menu .......... MENU button
- To return to the previous screen ...... RETURN button

When the is displayed on the Main display in the Full mode, the system is centrally controlled and the filter sign cannot be reset.

If two or more indoor units are connected, filter cleaning timing for each unit may be different, depending on the filter type.
The icon will appear when the filter on the main unit is due for cleaning.
When the filter sign is reset, the cumulative operation time of all units will be reset.

The icon is scheduled to appear after a certain duration of operation, based on the premise that the indoor units are installed in a space with ordinary air quality. Depending on the air quality, the filter may require more frequent cleaning.

The cumulative time at which filter needs cleaning depends on the model.

○: Can be used in combination  ×: Cannot be used in combination  △: Restricted

△1: This function is enabled after completing the high power operation because the high power operation has the higher priority.
△2: This function cannot be operated if some operation is locked.
△3: Night setback function cannot be used when the unit is in operation by On/Off timer setting.
△4: Auto-off function cannot be used for Night setback operation.
△5: Night setback function cannot be used when the unit is in operation by Weekly timer setting.
△6: Temperature range setting cannot be used for Night setback operation.
△7: Auto return function cannot be used for Night setback operation.

×1: Weekly timer setting is not effective because On/Off timer has the higher priority.
×2: Auto return function cannot be used because Temperature range setting has the higher priority.
This product is designed and intended for use in the residential, commercial, and light-industrial environment.

The product at hand is based on the following EU regulations:
• Electromagnetic Compatibility Directive 2014/30/EU
