## Great Features, Enhanced Functionality

### Excellent Sound Projection 10W Speaker + Audio Mix

A high-volume 10W speaker is built-in, eliminating the need for an external speaker. Using the "Audio Mix" feature and a wireless microphone, the presenter's voice is reproduced loud and clear in real time.

### Network Functionality Built-in RJ-45 Port

Connected to a dedicated LAN, the status of multiple projectors in the same building can be viewed. Remote operation of power switching (ON/OFF), image input switching and other functions are possible via the Web.

### Vastly Improved Operability Quick Menu

For improved operation ease, the tool bar has seven main menus and one custom menu. Switching to the sub-menu allows the selection of more specific operations.

## Professional Specifications and High Cost Performance

### Instant Shutdown Fast Pack-up Time for Presentations on the Move

Once the projector has been put in standby mode, the power cord can be disconnected straight away, without having to wait for the lamp to cool down. A handy feature, especially when you've got a tight schedule.

### Top-loading Lamp Simple Lamp Replacement

The projection lamp is installed in the upper section of the main body. Regardless of whether the projector is sitting on a shelf or suspended from the ceiling, lamp replacement is simple and easy, with no need to move the whole projector.

### Low Operating Cost Low-power Standby Mode (under 1W), 4,000hr Long-life Lamp, Filter-free

Low operating costs have been made possible by considering energy savings for every function. Maintenance has been reduced as well.

## Other Convenient Functions

### • Silent 26dBA Operation (in low mode)

When giving a presentation you don't want anything distracting from it. Thanks to its low operating noise, you can rely on the XD221U to help keep your audience focused.

### • Dual PC Input Terminal

Two computers can be connected at the same time.

### • New BrilliantColor™ Adopted

Mitsubishi Electric's original built-in colour wheel is incorporated for enhanced colour reproduction. Clear, vivid images are reproduced from computer and video signals.
