

Uninterruptible Power Supply M9950

120, 160, 200, 300, 400, 500, 600kVA

The M9950 offers a true on-line double conversion, high performance, high density and high efficiency experience to users. Designed with industry-leading power electronics and controls technology and incorporating innovative advanced multilevel conversion technology to create a 3-level output voltage which reduces switching loss.

Maximum Performance & Reliability

Our patented technology provides a true on-line double conversion UPS system that offers high efficiencies regardless of load type. Efficiency ratings as high as >96%, even with loads as low as 40%.

Low Conduction Losses Proprietary Power Module and Carrier Store Trend Bipolar Transistor (CSTBT) produces low conduction losses. The innovative CSTBT also provides lower on-state voltage and a better relationship between on-state voltage and saturation voltage. Advanced Multilevel Conversion Technology reduces switching loss.

Ease of Maintenance Designed with both reliability and maintenance in mind, the various system components minimise and ease system maintenance. Front access allows for ease of access and reduced mean time to repair (MTTR). Components such as high quality industrial grade fans provide longer life and enhanced dependability.

Elevate your Performance

- Efficiency up to 96%, even at low loads
- Compact design, small footprint
- Biodirectional power converters
- Advanced IGBT 3 level topology
- High performance full digital control

- Multiple cable entry points (top/bottom)
- Parallel up to 8 units (up to 4.8MVA of capacity)
- 150% Overload capacity for 1 minute
- 125% Overload capacity for 10 minutes
- VRLA, Flooded, Ni-Cad and LiB compatible

| | M9950 |
|-------------------------|-----------------------------------------------------------------------------------|
| | 3 phase UPS |
| Rated Output kVA | 120 160 200 300 400 500 600 |
| Rated Output kW | 108 144 180 270 360 450 540 |
| AC INPUT | |
| Configuration | 3 phase, 3wire |
| Voltage | 380V, 400V, 415V (+15% to -20%) |
| Frequency | 50 / 60Hz ±10% |
| Power Factor | >.99 Lagging |
| Reflected Current THDi | 5% max 100% load |
| BYPASS INPUT | |
| Configuration | 3 phase, 4 wire |
| Voltage | 380V, 400V, 415V ±10% |
| Frequency | 50/60Hz ±5% |
| Bypass Overload | 500% for 1 cycle |
| BATTERY | |
| Nominal Voltage | 480Vdc (Standard setting) |
| Float Voltage | 545Vdc (Standard setting) |
| Voltage Range | 400Vdc~600Vdc |
| Number of Cells | 240 |
| AC OUTPUT | |
| Voltage | 380V, 400V, 415V |
| Frequency | 50/60Hz |
| Configuration | 3 phase, 4 wire |
| Power Factor | 0.9 |
| Voltage Regulation | ±1% (0-100% balanced load) |
| Voltage Adj. Range | ±5.0% |
| Voltage Unbalance | 2% maximum at 100% unbalanced load |
| THD (Vout) | <2% THD at 100% linear load; <5% THD at 100% nonlinear load |
| Transient Response | $\pm 2\%$ maximum at 100% load step, $\pm 1\%$ maximum at loss/return of AC power |
| | ±5% maximum at load transfer to/from static bypass |
| Phase Displacement | ±1°@ 100% Balanced Load, ±3° @ 100% Unbalanced Load |
| Overload Capacity | 125% for 10minutes; 150% for 1minute |
| ENVIRONMENTAL | |
| Operating Temperature | 0~40°C |
| Efficiency (AC/AC) | 96% |
| Parallel Capability | 8 units |
| GENERAL | |
| Safety | IEC-62040-1 |
| EMC | IEC-62040-2 |
| Weight | 550 610 990 1100 1590 1650 |
| Dimensions (WxDxH) (mm) | 700 x 832 x 2080 1400 x 832 x 2080 1800 x 832 x 2080 |
| Cable Entry | Bottom Bottom / Top |
