A Life More Electric

HGS Glass Series

Bottom Mount

Combining style and functionality for the modern home, the HGS Glass Series bottom mount fridge has a unique 50:50 door design which is more aligned with standard Australian kitchen benchtops.

It features a sleek glass front door, a customisable zone for soft freezing or chilling, an automatic ice maker, and a Fresh Box with VitaLED.

Key Features

Automatic Ice Maker

There is no need for a separate plumbing connection.

The removable water tank can be filled with water and the Ice Maker is ready to go!

Select Zone

Features two main modes: Soft Freezing and Chilling, with 4 temperature settings, ranging from approximately -9°C to 0°C.

Customise the temperature based on your needs - chilling is ideal for storing foods like sausages, deli meats and cheese, and Soft Freezing keeps food 'softly' frozen.

Blue Catalyst Deodoriser

A fridge that smells clean and fresh! The Blue Catalyst Deodoriser has an inorganic antibacterial which helps reduce any odours.

Fresh Box VitaLED

Avoid food wastage and properly store your produce with the VitaLED - it slows down the wilting process, keeping your fruits and vegetables crisp and fresher for longer.

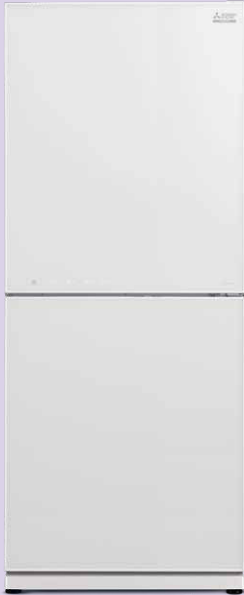

Soft Freezing

Available in the Select Zone, soft freezing allows food to be frozen for up to three weeks in a 'soft' state at about -7° C. This means food, like meat, soup, and sauces, can be more easily cut, divided or scooped without thawing.

50:50 Door Design

A premium look for a modern kitchen - the 50:50 design integrates into most existing cabinets and aligns with standard kitchen benchtops (900mm).
