A Life More Electric

WX Series

Multi Drawer

The innovative Vacuum Insulation Panel (VIP) and Smart Cube technologies maximize the WX Series capacity without increasing its dimensions. The luxurious glass door finish enhances the modern design.

Available in 700 and 470 litres catering for various kitchen sizes. The MR-WX470F is designed with a reduced height and width, to easily fit into a compact fridge cavity of 660mm width.

Key Features

Supercool Chilling Case

The Supercool chilling function is ideal for storing meat, fish, or other perishable food without freezing it. This provides the convenience of food ready to cook without the need to defrost it.

Vegetable Drawer

VitaLED lighting system slows down the wilting process, keeping fruit and vegetables crisper and fresher for longer. The vegetable drawer features a tray at the top which is ideal for storage and organisation of smaller items.

Automatic Ice Maker

There is no need for a separate plumbing connection. The removable water tank can be filled with water and all the parts are completely washable.

Clean Tray^{*1}

The Clean Tray was designed to keep the vegetable drawer clean with an anti-bacterial hybrid nano coating. This Clean Tray prevents dirt from sticking to the tray and is removable for easy cleaning.

^{*1} MR-WX700C feature only.

MR-WX700C-S

Supercool Freezing Drawer

The Supercool Freezing Drawer offers functionality in preserving food quality without losing moisture and taste. It has two main modes, Supercool Freezing and Hot Freezing.

Hot Freezing^{*2}

The LED Sensor is designed to detect hot food and adjust the cold air flow directly onto the hot food. This saves time while also preserving food quality and freshness.

Soft Freezing^{*2}

Soft Freezing allows food to be frozen for up to three weeks in a 'soft' state. This means meat can be easily cut without thawing.

Supercool Freezing^{*2}

Ensures food is frozen evenly, minimising cell destruction, preserving its freshness, texture and locking in maximum flavour.

*2 Please note these modes must be manually set in order to function.

Specifications Overview
